Yuri Vieira Teixeira

Front-End & Mobile Software Engineer | TypeScript | React | Angular | React Native

Nova Friburgo, Brazil | +55 22 99896-2216 | yurivieirateixeira98@gmail.com
linkedin.com/in/yuri-vieira-teixeira | github.com/DevYuriVieira | devyurivieira.vercel.app

PROFESSIONAL SUMMARY

Front-End and Mobile Software Engineer specializing in **TypeScript**, **React**, **Angular** and **React Native (Expo)**, with practical background in **RESTful APIs**, **Java (Spring Boot)**, **C#/.NET** and **PostgreSQL**. Hands-on experience developing responsive web and mobile applications, offline-first architectures, secure authentication flows (OAuth 2.0/OIDC, JWT, Keycloak), web accessibility (WCAG 2.1 AA/AAA) and automated test suites (Vitest, Jest, Playwright and Cypress). Completed over 910 hours of hands-on software development training through Serratec and UECE. Postgraduate degree in Software Engineering. Advanced English (B2+). Open to remote opportunities in Brazil and internationally.

KEY ACHIEVEMENTS

ZEISS AI Recommendation Platform: Corporate MVP built with an 11-member team for ZEISS, developing the React and TypeScript frontend for assisted OCR prescription validation, AI-driven lens recommendations (n8n/RAG) and real-time analytics dashboards.

Work-Fitness (Client Platform) & Interactive Portfolio: Commercial platform delivered for a real client (WhatsApp lead triage, 217 automated tests) and personal interactive portfolio (Angular Signals, WebGL/Three.js, 213 automated tests), both scoring 100/100 across all four Google Lighthouse categories (desktop audit).

FarmFlow Mobile (Offline-First React Native): Precision agri-tech mobile application in React Native (Expo) with an offline-first FIFO mutation queue, MAPA spray records with canvas SHA-256 cryptographic signatures, OIDC biometric login and 138 tests across 26 Jest suites.

TECHNICAL SKILLS

Languages: TypeScript | JavaScript (ES6+) | HTML5 | CSS3 / SCSS | SQL

Frontend Web: React | Angular (Signals, Standalone, OnPush, PWA) | Three.js / WebGL | Framer Motion | Styled Components | Vite

Mobile & UI/UX: React Native (Expo, Offline-First) | React Navigation | React Hook Form | Zod | Accessibility (WCAG 2.1 AA/AAA & VLibras)

Testing & Quality: Vitest | Jest | Playwright (E2E) | Cypress | Axe-Core | Google Lighthouse

API & Backend Integration: RESTful APIs | OAuth 2.0 / OIDC (Keycloak) & JWT | Java (Spring Boot) | C# (.NET) | PostgreSQL

DevOps & Architecture: Docker | Nginx | CI/CD (GitHub Actions, Vercel) | Git | Clean Architecture | Agile / Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Freelance Developer — Work-Fitness

Independent Client | 2025 - Present | Remote

- End-to-end development and ongoing maintenance of a commercial platform deployed in production (viniciusantos.vercel.app), owning client requirements gathering, Clean Architecture design, **TypeScript** implementation and containerized deployment with **Docker and Nginx**.
- Implemented a UTM-tracked WhatsApp lead qualification funnel, analytics telemetry (GA4, GTM and Meta Pixel), web accessibility compliance (WCAG 2.1 AA and VLibras) and continuous automated quality verification.

Programming Instructor

SENAI / FAETEC | Aug 2026 - Oct 2026 (Contract) | Nova Friburgo, Brazil

- Taught a class of 10 students covering programming logic with **JavaScript**, relational databases with DBeaver and PostgreSQL, OOP in Java and **RESTful APIs with Spring Boot**, culminating in an integrated project.
- Created all teaching materials (exercise guides, summaries, tutorials and support resources) from the institution's syllabus, providing individualized one-on-one support for students.

Front-End & Full-Stack Developer (Software Residency)

Serratec - TIC/Software Residency | Feb 2026 - Jul 2026 | Petrópolis, Brazil | 790 h

- Completed a 790-hour intensive software residency with strong focus on **Web Frontend (React, TypeScript, HTML5/CSS3)** and **Mobile (React Native with Expo)** integrated with Spring Boot RESTful APIs, culminating in a corporate MVP delivered under contract in partnership with **ZEISS**.
- Delivered practical applications at the end of each track, building responsive interfaces, schema-validated forms (Zod), state management flows and asynchronous API integrations in an Agile team (Scrum, Git and code reviews).

Logistics Operations Agent

Fri On Line | Feb 2025 - May 2025 | Nova Friburgo, Brazil

- Managed operational schedules for field technicians, monitoring SLA compliance and ensuring on-time service delivery across regional routes.
- Provided Tier-1 operational support, resolving scheduling conflicts and handling direct communication with commercial clients.

PROJECTS

ZEISS - AI Recommendation Platform

Collaborative (11 devs, 1 PO, 1 SM) | 2026 | React | TypeScript | Vite | Styled Components | React Router | ApexCharts | Java | Spring Boot | OCR & RAG (n8n) - Serratec Final Project · Corporate MVP (Contract)

- Optical shop sellers were reading prescriptions and choosing lenses manually, making recommendations inconsistent. The team built a web platform with a **React, TypeScript and Styled Components front end** (connected to a Java/Spring Boot back end and an n8n/RAG AI pipeline) featuring an assisted Human-in-the-Loop validation modal with field-level OCR confidence scores and matching optical parameters with patient lifestyle habits to recommend the ideal ZEISS lens.
- Built **interactive analytics dashboards with ApexCharts** for store managers and ZEISS corporate teams (best-selling and most recommended lenses, temporal trends, conversion rates and seller rankings). Role-based UI route protection backed by a three-tier JWT hierarchy (ZEISS admin, store manager, employee), consultation lifecycle state machine (`RECOMMENDED`, `SOLD`, `CANCELLED`) and full CRUD views for stores, products and employees.

FarmFlow - Offline-First Mobile App - github.com/DevYuriVieira/farmflow-mobile

Personal | 2026 | React Native | Expo | TypeScript | Offline-First Architecture | Keycloak OIDC | Jest | Java / Spring Boot API

- Mobile application for field operators working without connectivity: a **transactional FIFO mutation queue** persisted locally in AsyncStorage with deterministic reconciliation on reconnect, ensuring zero lost spray records.
- MAPA-mandated spray records with a **canvas-drawn digital signature and SHA-256 cryptographic hash** and biometric login with Keycloak OIDC, integrated with a Java / Spring Boot backend sustaining **2,450 requests per second (req/s)** with zero HTTP 5xx responses in k6 load tests (controlled benchmark environment).
- Covered by **138 automated tests across 26 Jest suites** on the mobile client, within a 549-test suite spanning mobile and backend.

Work-Fitness - Commercial Platform - viniciusantos.vercel.app

Freelance (Real Client) | 2025 - Present | TypeScript | Vite | Clean Architecture | Vitest | Playwright | WCAG 2.1 AA | VLibras | Docker | Nginx | Deployed in production

- Engineered a body assessment engine (WHO BMI, Deurenberg body fat percentage and Mifflin-St Jeor BMR calculations) isolated in a **DOM-free Clean Architecture core**, achieving a 32 kB bundle and a **100/100 score across all four Google Lighthouse categories (desktop audit)**.
- Treated accessibility as a core engineering requirement (WCAG 2.1 AA, VLibras widget with zero layout shift, bionic reading formatting and colorblind filters), verified by **217 automated tests (170 Vitest unit tests and 47 Playwright E2E specs across 26 viewports)**, deployed in a multi-stage Docker container with Nginx.

Personal Portfolio - github.com/DevYuriVieira/portfolio · devyurivieira.vercel.app

Personal | 2026 | Angular | TypeScript | Three.js / WebGL | SCSS | Vitest | Playwright | Cypress | PWA | Deployed in production

- Built with **Angular** standalone components, **native Signals (`signal/computed`)** and `OnPush` change detection throughout, including a GPU-accelerated **Three.js/WebGL** particle system with mouse and touch interactivity, configured as an offline-ready PWA with a service worker.
- Covered by **213 automated tests** across three layers (158 Vitest unit tests, 38 Playwright E2E specs with WCAG 2.1 AA/AAA accessibility audits via Axe-Core and 17 Cypress E2E specs), trilingual i18n (PT/EN/ES) and a 100/100 score across all four Google Lighthouse categories (desktop audit).

PlayStation Evolution Timeline - github.com/DevYuriVieira/playstation-evolution-timeline

Personal | 2026 | React | TypeScript | Vite | Framer Motion | CSS Modules | Intersection Observer | Deployed in production

- Web application deployed in production (playstation-evolution-timeline.vercel.app) showcasing 30 years of PlayStation console hardware evolution (PS1 to PS5 Pro), engineered with modular **React, TypeScript and CSS Modules** components and viewport-centered scroll orchestration via the **Intersection Observer API** (`rootMargin: "-50%"`), eliminating main-thread scroll listeners.
- Implements visibility-triggered numeric counters (`StatsAnimated`) and hardware-accelerated **60 FPS animations using Framer Motion** without layout thrashing, an adaptive `SideTimeline` navigation bar and automated CI/CD via GitHub and Vercel.

EDUCATION

Postgraduate Degree in Software Engineering
Estácio University | 2024 - 2025

Technology Residency - TIC/Software Full-Stack (790 h)
Serratec | Feb 2026 - Jul 2026

Technology Residency - TIC 12 (120 h)
State University of Ceará (UECE) | Oct 2025 - Dec 2025

Bachelor's Degree in Industrial Engineering
Estácio University | 2017 - 2022

CERTIFICATIONS & ADDITIONAL TRAINING

- **Front-End Development with Artificial Intelligence (80 h)** - Senac
- **Philips Full-Stack Developer Bootcamp (TypeScript, Angular, Java) (132 h)** - DIO
- **Software Testing Fundamentals (24 h)** - Instituto de Pesquisas Eldorado
- **English Language Programme (Completed)** - Wizard by Pearson
- **White Belt - Lean Six Sigma** - Frons

LANGUAGES

Portuguese Native | **English** Advanced (B2+) | **Spanish** Advanced (B2+)
