Yuri Vieira Teixeira

Back-End Software Engineer | Java (Spring Boot) | C# / .NET | PostgreSQL

Nova Friburgo, Brazil | +55 22 99896-2216 | yurivieirateixeira98@gmail.com
linkedin.com/in/yuri-vieira-teixeira | github.com/DevYuriVieira | devyurivieira.vercel.app

PROFESSIONAL SUMMARY

Back-End Software Engineer specializing in **Java (Spring Boot)** and **C#/.NET (ASP.NET Core)**, with practical background in **Python (Django)**, **TypeScript**, **RESTful APIs**, **RabbitMQ** and **PostgreSQL**. Hands-on experience developing distributed systems, event-driven architectures, secure APIs (OAuth 2.0/OIDC, JWT, Keycloak, Spring Security), transactional messaging patterns and automated test suites (JUnit, xUnit and k6). Completed over 910 hours of intensive software development training through Serratec and UECE. Postgraduate degree in Software Engineering. Upper-Intermediate / Advanced English (B2+). Open to remote opportunities in Brazil and internationally.

KEY ACHIEVEMENTS

ZEISS AI Recommendation Platform: Corporate MVP built with an 11-developer team for ZEISS, integrating Java and Spring Boot REST APIs, WebFlux, PostgreSQL, three-tier JWT role-based access control and an OCR + AI pipeline (n8n/RAG).

FleetOps API (.NET & RabbitMQ): Distributed architecture in C# and .NET with Clean Architecture, DDD, Transactional Outbox, RabbitMQ, Keycloak OIDC, PostgreSQL, 300 automated xUnit tests and 278 sustained requests per second (req/s) under ACID write workloads in k6 (controlled benchmark).

FarmFlow Backend (Java & Virtual Threads): Distributed engine in Java and Spring Boot reaching ~845 req/s in-memory and ~293 req/s in transactional writes in controlled k6 benchmarks with zero HTTP 5xx responses, Transactional Outbox over RabbitMQ, time-series partitioned PostgreSQL with fail-closed Row-Level Security and 445 automated tests.

TECHNICAL SKILLS

Languages: Java | C# | SQL | Python | TypeScript

Backend Frameworks: Spring Boot | Spring Security | ASP.NET Core (.NET) | Django | JPA / Hibernate | Entity Framework Core | JDBC

Messaging & Security: RabbitMQ | Transactional Outbox | OAuth 2.0 / OIDC (Keycloak) | JWT & RBAC

Databases: PostgreSQL | MySQL | Relational Modeling (3NF) | Partitioning & Indexing | ACID Transactions

Testing & Observability: JUnit | xUnit | k6 (Load Testing) | OpenTelemetry & Jaeger | Vitest | Playwright

DevOps & Architecture: Docker | CI/CD (GitHub Actions) | Git | Linux / Nginx | Swagger / OpenAPI | Clean Architecture | DDD | SOLID | Agile / Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Freelance Developer — Work-Fitness

Independent Client | 2026 - Present | Remote

- End-to-end development and maintenance of a commercial platform deployed in production (viniciusantos.vercel.app), responsible for Clean Architecture, domain logic in **TypeScript**, **217 automated tests** and multi-stage **Docker and Nginx** deployment.

Back-End Programming Instructor (Java)

SENAI / FAETEC | Aug 2026 - Oct 2026 (Contract) | Nova Friburgo, Brazil

- Taught a class of 10 students in Back-End Programming covering programming logic, relational databases with **DBeaver and PostgreSQL**, **OOP in Java** and **RESTful APIs with Spring Boot**, culminating in an integrated project.
- Created all teaching materials (exercise guides, summaries, tutorials and support resources) from the institution's syllabus, providing individualized one-on-one support for students.

Full-Stack / Back-End Developer (Software Residency)

Serratec - TIC/Software Residency | Feb 2026 - Jul 2026 | Petrópolis, Brazil | 790 h

- Completed a 790-hour intensive software residency with strong focus on **PostgreSQL Databases**, **OOP in Java** and **RESTful APIs with Spring Boot and Spring Security**, culminating in a corporate MVP delivered under contract in partnership with **ZEISS**.
- Designed and implemented layered backend architectures (Controller, Service, Repository, DAO, DTOs), 3NF relational schemas, JWT/RBAC authentication and API integrations in an Agile team (Scrum, Git and code reviews).

Logistics Operations Agent

Fri On Line | Feb 2025 - May 2025 | Nova Friburgo, Brazil

- Managed operational schedules for field technicians, monitoring SLA compliance, resolving scheduling conflicts and providing Tier-1 operational support for commercial clients.

PROJECTS

ZEISS - AI Recommendation Platform

Collaborative (11 devs, 1 PO, 1 SM) | 2026 | Java | Spring Boot | Spring WebFlux | PostgreSQL | JWT (RBAC) | n8n (OCR & RAG) | OpenAPI - Serratec Final Project · Corporate MVP (Contract)

- Enterprise REST API in **Java, Spring Boot and PostgreSQL** featuring non-blocking prescription streaming via **Spring WebFlux** `WebClient` to an OCR and AI pipeline (n8n/RAG), extraction confidence scoring and automated ZEISS lens recommendation.
- Stateless JWT authentication with three-tier RBAC (ZEISS admin, store manager, employee), session IP auditing, commercial sales state machine (`RECOMMENDED`, `SOLD`, `CANCELLED`) and full CRUD documented via Swagger / OpenAPI.

FleetOps API (C# / .NET) - github.com/DevYuriVieira/fleetops-api

Personal | 2026 | C# | .NET | ASP.NET Core | PostgreSQL | Entity Framework Core | RabbitMQ | Keycloak OIDC | OpenTelemetry | xUnit

- Distributed, event-driven fleet and logistics REST API engine in **C# and .NET** (28 business endpoints across 5 DDD Bounded Contexts: Vehicles, Drivers, Deliveries, Routes and Maintenance) with Clean Architecture, operating as an OAuth 2.0 / OIDC Resource Server with **Keycloak (RS256/JWKS)** and RBAC across four roles.
- Implements **Transactional Outbox** integrated into DbContext eliminating dual-write hazards, optimistic concurrency via PostgreSQL `xmin`, concurrent polling via `FOR UPDATE SKIP LOCKED`, **RabbitMQ** messaging (Publisher Confirms, TTL retry queues and Dead-Letter Queue), idempotent consumer by `MessageId` and distributed tracing with OpenTelemetry and Jaeger.
- Suite of **300 automated tests** (166 unit and 134 integration, concurrency and fault-injection) in xUnit with 100% pass rate and validated throughput of **278 sustained req/s under ACID write workloads** in k6 load tests (controlled benchmark environment).

FarmFlow - Distributed Agri-Tech Platform (Java) - github.com/DevYuriVieira/farmflow-backend

Personal | 2026 | Java | Spring Boot | Virtual Threads | PostgreSQL | RabbitMQ | Keycloak OIDC | OpenTelemetry | k6

- Distributed platform engineered for critical agro-industrial operations: **Java with Virtual Threads and Spring Boot** backend reaching **~845 req/s in-memory HTTP, 780.5 req/s Rate Limiting and ~293 req/s in transactional writes** in k6 load tests (controlled benchmark) with zero HTTP 5xx responses, for IoT telemetry and MAPA compliance.
- Consistency without dual-writes: **Transactional Outbox** over RabbitMQ (CloudEvents, Publisher Confirms, DLQ), concurrent polling via `FOR UPDATE SKIP LOCKED`, choreographed sagas with advisory locks (`pg_try_advisory_xact_lock`) and end-to-end distributed tracing with OpenTelemetry.
- Data and security architecture: **PostgreSQL** with declarative time-series partitioning, BRIN indexes and **fail-closed Row-Level Security**; Keycloak OIDC with IDOR enumeration protection (404 instead of 403) and **445 automated backend tests** (583 across the full platform) executing under 100 Virtual Threads.

Spring Boot E-Commerce API - github.com/DevYuriVieira/ecommerce-serratec-api

Collaborative (5 devs - Serratec Residency) | 2026 | Java | Spring Boot | Spring Security | PostgreSQL | JPA/Hibernate | Swagger/OpenAPI

- Team-developed RESTful API in **Java and Spring Boot** structured in decoupled layers (Controller, Service, Repository, DTOs), managing order lifecycles with N:N mappings, dynamic item totalization and concurrent inventory control.
- Security via **Spring Security filter chain (stateless JWT / RBAC)**, external ViaCEP API integration for automatic address resolution, transactional email notifications with JavaMail, global exception handling (`@ControllerAdvice`) and OpenAPI / Swagger UI contracts.

Payroll System & Dental Clinic Management (DCMS) - Payroll (Java/JDBC) · DCMS (PostgreSQL)

Collaborative (Serratec Residency) | 2026 | Java | JDBC | PostgreSQL | 3NF Modeling | MVC & DAO Architecture | BigDecimal

- **Payroll System:** Batch CSV processing and progressive INSS and IRRF tax calculations with exact monetary precision (`BigDecimal HALF_UP`), persisting through **raw JDBC on PostgreSQL** in a layered MVC + DAO architecture with custom domain exceptions.
- **DCMS:** Transactional relational database in **PostgreSQL strictly normalized up to 3rd Normal Form (3NF)** with DDL constraints, referential integrity, B-Tree indexes and analytical SQL queries for operational and revenue reporting.

EDUCATION

Technology Residency - TIC/Software Full-Stack (790 h)
Serratec | Feb 2026 - Jul 2026

Technology Residency - TIC 12 (120 h)
State University of Ceará (UECE) | Oct 2025 - Dec 2025

Postgraduate Degree in Software Engineering
Estácio University | 2024 - 2025

Bachelor's Degree in Industrial Engineering
Estácio University | 2017 - 2022

CERTIFICATIONS & ADDITIONAL TRAINING

- **Programming in Python (Django) (168 h)** - Senac
- **Philips Full-Stack Developer Bootcamp (Java, Spring Boot, SQL) (132 h)** - DIO
- **SQL Database - Intermediate and Advanced** - Instituto Matera
- **Software Testing Fundamentals (24 h)** - Instituto de Pesquisas Eldorado
- **English Language Programme (Completed)** - Wizard by Pearson
- **White Belt - Lean Six Sigma** - Frons
