Yuri Vieira Teixeira

Full-Stack Software Engineer | Java (Spring Boot) | C# / .NET | TypeScript (React & Angular)

Nova Friburgo, Brazil | +55 22 99896-2216 | yurivieirateixeira98@gmail.com
linkedin.com/in/yuri-vieira-teixeira | github.com/DevYuriVieira | devyurivieira.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Software Engineer specializing in **Java (Spring Boot)**, **C#/.NET (ASP.NET Core)** and **TypeScript (React, Angular and React Native)**, with practical background in **Python (Django)**, **RESTful APIs**, **RabbitMQ** and **PostgreSQL**. Hands-on experience developing web and mobile applications, distributed systems, secure APIs, event-driven architectures and automated test suites, applying OAuth 2.0/OIDC, JWT, Keycloak, transactional messaging patterns and AI integrations. Completed over 910 hours of intensive software development training through Serratec and UECE. Postgraduate degree in Software Engineering. Upper-Intermediate / Advanced English (B2+). Open to remote opportunities in Brazil and internationally.

KEY ACHIEVEMENTS

ZEISS AI Recommendation Platform: Corporate full-stack MVP built with an 11-developer team for ZEISS (React, TypeScript and Java/Spring Boot), replacing manual prescription reading with OCR + AI (n8n/RAG) and real-time analytics dashboards.

FarmFlow & FleetOps (Distributed Systems): Event-driven architectures with Transactional Outbox, RabbitMQ, Keycloak OIDC and PostgreSQL: FarmFlow (Java Virtual Threads + Offline-First React Native, ~845 req/s in-memory and ~293 req/s transactional in controlled benchmarks, 583 automated tests) and FleetOps (C#/.NET, 278 sustained req/s under ACID write workloads in controlled benchmarks, 300 automated tests).

Work-Fitness (Client Platform) & Interactive Portfolio: Commercial platform delivered for a real client (WhatsApp lead triage, 217 automated tests) and personal interactive portfolio (Angular Signals, WebGL/Three.js, 213 automated tests), both scoring 100/100 across all four Google Lighthouse categories (desktop audit).

TECHNICAL SKILLS

Languages: Java | C# | TypeScript | JavaScript (ES6+) | Python | SQL

Frontend & Mobile: React | Angular (Signals, Standalone, OnPush, PWA) | React Native (Expo) | Three.js / WebGL | HTML5 / SCSS | WCAG 2.1 AA/AAA

Backend & Messaging: Spring Boot | Spring Security | ASP.NET Core (.NET) | Django | RabbitMQ | JPA / Hibernate | Entity Framework Core | OAuth 2.0 / OIDC (Keycloak) & JWT

Databases: PostgreSQL | MySQL | Relational Modeling (3NF) | Partitioning & Indexing | ACID Transactions

Testing & Observability: JUnit | xUnit | Vitest | Jest | Playwright (E2E) | Cypress | k6 (Load Testing) | OpenTelemetry & Jaeger

DevOps & Architecture: Docker | Nginx | CI/CD (GitHub Actions, Vercel) | Git | Swagger / OpenAPI | Clean Architecture | DDD | SOLID | Agile / Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Independent Projects / Freelance | 2026 - Present | Remote

- End-to-end development and ongoing maintenance of a commercial platform deployed in production (viniciusantos.vercel.app), owning client requirements gathering, Clean Architecture design, **TypeScript** implementation and containerized deployment with **Docker and Nginx**.
- Implemented a UTM-tracked WhatsApp lead qualification funnel, analytics telemetry (GA4, GTM and Meta Pixel), web accessibility compliance (WCAG 2.1 AA and VLibras) and continuous automated quality verification.

Back-End Programming Instructor (Java)

SENAI / FAETEC | Aug 2026 - Oct 2026 (Contract) | Nova Friburgo, Brazil

- Taught a class of 10 students in Back-End Programming covering programming logic (JavaScript), relational databases with DBeaver and PostgreSQL, **OOP in Java** and **RESTful APIs with Spring Boot**, culminating in an integrated project.
- Created all teaching materials (exercise guides, summaries, tutorials and support resources) from the institution's syllabus, providing individualized one-on-one support for students.

Full-Stack Developer (Software Residency)

Serratec - TIC/Software Residency | Feb 2026 - Jul 2026 | Petrópolis, Brazil | 790 h

- Completed a 790-hour intensive software residency across progressive tracks: logic, PostgreSQL databases, **OOP in Java**, frontend, **RESTful APIs with Spring Boot**, **React and React Native**, culminating in a full-stack final project delivered as a corporate MVP under contract in partnership with **ZEISS**.
- Delivered practical projects in an Agile team (Scrum, Git and code reviews) at the end of each subject, from 3NF data modeling to responsive interfaces and API integrations, applying OOP, SOLID and clean-code standards across all deliverables.

Logistics Operations Agent

Fri On Line | Feb 2025 - May 2025 | Nova Friburgo, Brazil

- Managed operational schedules for field technicians, monitoring SLA compliance and ensuring on-time service delivery across regional routes.
- Provided Tier-1 operational support, resolving scheduling conflicts and handling direct communication with commercial clients.

PROJECTS

ZEISS - AI Recommendation Platform

Collaborative (11 devs, 1 PO, 1 SM) | 2026 | React | TypeScript | Styled Components | ApexCharts | Java | Spring Boot | PostgreSQL | JWT | n8n (OCR & RAG) - Serratec Final Project · Corporate MVP (Contract)

- Optical shop sellers were reading prescriptions and choosing lenses by hand, making recommendations inconsistent. The team built a full-stack web platform (**React, TypeScript and Styled Components front end; Java, Spring Boot and PostgreSQL back end**) that streams prescriptions via WebFlux to an OCR and AI pipeline (n8n/RAG), provides assisted Human-in-the-Loop validation with confidence scores and cross-references diopters and lifestyle habits to suggest the right ZEISS lens.
- Interactive analytics dashboards built with **ApexCharts** track conversion rates, temporal trends and seller rankings for store managers and ZEISS corporate teams. Stateless JWT authentication backs a three-tier RBAC hierarchy (ZEISS admin, store manager, employee), a sales lifecycle state machine (`RECOMMENDED`, `SOLD`, `CANCELLED`), IP session auditing and full CRUD for stores, products and employees.

FleetOps API (C# / .NET) - github.com/DevYuriVieira/fleetops-api

Personal | 2026 | C# | .NET | ASP.NET Core | PostgreSQL | Entity Framework Core | RabbitMQ | Keycloak OIDC | OpenTelemetry | xUnit

- Distributed, event-driven fleet and logistics REST API engine in **C# and .NET** (28 business endpoints across 5 DDD Bounded Contexts) with Clean Architecture, operating as an OAuth 2.0 / OIDC Resource Server with **Keycloak (RS256/JWKS)** and RBAC across four roles.
- Implements the **Transactional Outbox pattern** with **RabbitMQ** publishing (Publisher Confirms, TTL retry queues and a Dead-Letter Queue), an idempotent consumer keyed by `MessageId`, optimistic concurrency with PostgreSQL `xmin`, concurrent polling via `FOR UPDATE SKIP LOCKED`, distributed tracing in Jaeger, **300 automated xUnit tests** and **278 sustained req/s under ACID write workloads** in k6 load tests (controlled benchmark environment).

FarmFlow - Offline-First Mobile + Distributed Backend - GitHub (Mobile) · GitHub (Backend)

Personal | 2026 | React Native | Expo | Java | Spring Boot | Virtual Threads | PostgreSQL | RabbitMQ | Keycloak OIDC | OpenTelemetry

- End-to-end agri-tech platform for field operations without connectivity: a **React Native app with an offline-first FIFO mutation queue** and deterministic reconciliation on reconnect, MAPA spray records with a **canvas digital signature and SHA-256 cryptographic hash**, and IoT telemetry for irrigation pivots and silos.
- A **Java Virtual Threads and Spring Boot** backend reaching **~845 req/s in-memory and ~293 req/s in transactional writes** in k6 load tests (controlled benchmark) with zero HTTP 5xx responses, built on the **Transactional Outbox** pattern with RabbitMQ (CloudEvents, DLQ), `FOR UPDATE SKIP LOCKED`, PostgreSQL with time-series partitioning and **fail-closed Row-Level Security**, and distributed tracing with OpenTelemetry.
- Verifiable quality across both sides: **583 automated tests** (445 backend and 138 mobile across 26 Jest suites), Keycloak OIDC authentication with biometrics in the mobile app and IDOR enumeration protection in the API.

Work-Fitness - Commercial Platform - viniciusantos.vercel.app

Freelance (Real Client) | 2026 | TypeScript | Vite | Clean Architecture | Vitest | Playwright | WCAG 2.1 AA | VLibras | Docker | Nginx | Deployed in production

- Engineered a body assessment engine (WHO BMI, Deurenberg body fat percentage and Mifflin-St Jeor BMR calculations) isolated in a **DOM-free Clean Architecture core**, achieving a 32 kB bundle and a **100/100 score across all four Google Lighthouse categories (desktop audit)**.
- Treated accessibility as a core engineering requirement (WCAG 2.1 AA, VLibras widget with zero layout shift, bionic reading formatting and colorblind filters), verified by **217 automated tests (170 Vitest unit tests and 47 Playwright E2E specs across 26 viewports)**, deployed in a multi-stage Docker container served by Nginx.

Personal Portfolio - github.com/DevYuriVieira/portfolio · devyurivieira.vercel.app

Personal | 2026 | Angular | TypeScript | Three.js / WebGL | SCSS | Vitest | Playwright | Cypress | PWA | Deployed in production

- Built with **Angular** standalone components, native Signals (`signal/computed`) and `OnPush` change detection throughout, including a GPU-accelerated **Three.js/WebGL** particle system with mouse and touch interactivity, configured as an offline-ready PWA with a service worker.
- Covered by **213 automated tests** across three layers (158 Vitest unit tests, 38 Playwright E2E specs with WCAG 2.1 AA/AAA accessibility audits via Axe-Core and 17 Cypress E2E specs), trilingual i18n (PT/EN/ES) and a 100/100 score across all four Google Lighthouse categories (desktop audit).

EDUCATION

Technology Residency - TIC/Software Full-Stack (790 h)
Serratec | Feb 2026 - Jul 2026

Technology Residency - TIC 12 (120 h)
State University of Ceará (UECE) | Oct 2025 - Dec 2025

Postgraduate Degree in Software Engineering
Estácio University | 2024 - 2025

Bachelor's Degree in Industrial Engineering
Estácio University | 2017 - 2022

CERTIFICATIONS & ADDITIONAL TRAINING

- **Programming in Python (Django) (168 h)** - Senac
- **Front-End Development with Artificial Intelligence (80 h)** - Senac
- **Philips Full-Stack Developer Bootcamp (Java, Spring Boot, Angular) (132 h)** - DIO
- **SQL Database - Intermediate and Advanced** - Instituto Matera
- **Software Testing Fundamentals (24 h)** - Instituto de Pesquisas Eldorado
- **English Language Programme (Completed)** - Wizard by Pearson
- **White Belt - Lean Six Sigma** - Frons
