Yuri Vieira Teixeira

Full-Stack Software Engineer | Java (Spring Boot) | .NET / C# | TypeScript (React & Angular)

Nova Friburgo, Brazil | +55 22 99896-2216 | yurivieirateixeira98@gmail.com
linkedin.com/in/yuri-vieira-teixeira | github.com/DevYuriVieira | devyurivieira.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a focus on **Java (Spring Boot)**, **.NET 10 (C#)** and **TypeScript (React, Angular and React Native)**, plus hands-on experience in **Python (Django)**, **REST APIs**, **RabbitMQ** and **PostgreSQL**. I build complete applications covering security (JWT, Keycloak OIDC), generative AI integrations and automated test suites. Over 910 h of software development training at Serratec and UECE. Postgraduate in Software Engineering. Advanced English (B2+), with a C1/C2 programme completed at Wizard. Open to national and international remote roles.

KEY ACHIEVEMENTS

Live Production App (Angular 22 & WebGL)	Personal portfolio built with Angular 22 and TypeScript, native Signals and a GPU-accelerated WebGL particle system, covered by 195 automated tests (Vitest, Playwright + Axe-Core and Cypress) and a 100/100/100/100 Lighthouse audit on desktop.
Zeiss AI Recommendation Platform	Full-stack MVP built with an 11-person team for Zeiss (React, TypeScript and Java/Spring Boot 4), replacing manual prescription reading with OCR + AI-driven lens recommendations and real-time sales dashboards.
Programming Instructor	Taught Back-End Programming (Java/Spring Boot, OOP and PostgreSQL) to a class of 10 students at SENAI/FAETEC, creating all teaching material from the institution's syllabus.

TECHNICAL SKILLS

Languages	Java 17+ | C# 14 (.NET 10) | TypeScript | JavaScript (ES6+) | Python | SQL
Frontend & Mobile	React | Angular 22 (Signals, Standalone, OnPush, PWA) | React Native (Expo SDK 54) | Three.js / WebGL | SCSS | Zod | HTML5 | CSS3
Backend & Messaging	Spring Boot 3/4 | ASP.NET Core (.NET 10) | Django | REST APIs | RabbitMQ (Outbox, DLQ) | JPA/Hibernate | EF Core 10 | Spring Security 6 | Keycloak OIDC | JWT & Webhooks
Testing & Quality	xUnit | JUnit 5 | Vitest | Playwright | Cypress | Axe-Core (WCAG) | k6 (Load Testing) | OpenTelemetry & Jaeger
Databases	PostgreSQL 16/18 (FOR UPDATE SKIP LOCKED, MVCC xmin, 3NF) | MySQL | SQLite | SQL | Query Optimisation (N+1 elimination)
Tools	Git | GitHub Actions | Docker & Docker Compose | DBeaver | Vercel (CI/CD) | Swagger / OpenAPI 3 | Maven | n8n & OCR
Practices	Clean Architecture | Domain-Driven Design (DDD) | SOLID | Agile / Scrum | API-First

PROFESSIONAL EXPERIENCE

Back-End Programming Instructor (Java)

SENAI / FAETEC | Aug 2026 - Oct 2026 (Contract) | Nova Friburgo, Brazil

- Taught a class of 10 students in Back-End Programming covering programming logic (JavaScript), relational databases with DBeaver and PostgreSQL, **OOP in Java**, and **REST APIs with Spring Boot**, closing with an integrative project.
- Created all teaching material (exercise PDFs, summaries, tutorials and support resources) from the institution's syllabus, plus one-on-one support for students.

Full-Stack Developer (Software Residency)

Serratec - TIC/Software Residency | Feb 2026 - Jul 2026 | Petropolis, Brazil | 790 h

- Completed a programme in progressive tracks: logic, PostgreSQL databases, **OOP in Java**, frontend, **RESTful APIs with Spring Boot**, **React and React Native**, closing with a full-stack final project delivered as a corporate MVP under contract, in partnership with **Zeiss**.
- Delivered practical projects at the end of each subject, from 3NF data modelling to responsive interfaces and API integrations.
- Worked in an Agile team with Git, code reviews and sprints, applying OOP, SOLID and clean-code standards across all deliverables.

PROJECTS

Zeiss - AI Recommendation Platform

Collaborative (11 devs, 1 PO, 1 SM) | 2026 | React 19 | TypeScript 6 | Styled Components | ApexCharts | Java 17 | Spring Boot 4.1 | PostgreSQL 18 | JWT | n8n (OCR & RAG) - Serratec Final Project · Corporate MVP (contract)

- Optical shop sellers were reading prescriptions and choosing lenses by hand, making recommendations inconsistent. The team built a full-stack web platform (**React 19, TypeScript and Styled Components front end; Java 17, Spring Boot 4.1 and PostgreSQL 18 back end**) that streams prescriptions via WebFlux to an OCR and AI pipeline (n8n/RAG), provides assisted Human-in-the-Loop validation with confidence scores and cross-references diopters and lifestyle habits to suggest the right Zeiss lens.
- Interactive analytics dashboards built with **ApexCharts** track conversion rates, temporal trends and seller rankings for store managers and Zeiss headquarters. Stateless JWT authentication backs a three-tier RBAC hierarchy (Zeiss admin, store manager, employee), a sales lifecycle state machine (`RECOMMENDED`, `SOLD`, `CANCELLED`), IP session auditing and full CRUD for stores, products and employees.

FleetOps API (C# / .NET) - github.com/DevYuriVieira/fleetops-api

Personal | 2026 | C# 14 | .NET 10 | ASP.NET Core | PostgreSQL 18 | EF Core 10 | RabbitMQ | Keycloak OIDC | OpenTelemetry | xUnit

- Distributed, event-driven fleet and logistics REST API engine in **.NET 10 (C# 14)** (27 endpoints across 5 DDD Bounded Contexts) with Clean Architecture, operating as an OAuth 2.0 / OIDC Resource Server with **Keycloak (RS256/JWKS)** and RBAC across four roles.
- Implements the **Transactional Outbox pattern** with **RabbitMQ** publishing (Publisher Confirms, TTL retry queues and a Dead-Letter Queue), an idempotent consumer keyed by `MessageId`, optimistic concurrency with PostgreSQL `xmin`, `FOR UPDATE SKIP LOCKED`, distributed tracing in Jaeger, **300 automated xUnit tests** and **278 sustained RPS** under ACID writes (k6).

Personal Portfolio - devyurivieira.vercel.app

Personal | 2026 | Angular 22 | TypeScript | Three.js / WebGL | SCSS | Vitest | Playwright | Cypress | PWA | Live in production

- Built with **Angular 22** standalone components, native Signals (`signal/computed`) and `OnPush` change detection throughout, including a GPU-accelerated **Three.js/WebGL** particle system with mouse and touch interactivity, configured as a PWA with a service worker.
- Covered by **195 automated tests** across three layers (140 Vitest unit tests, 38 Playwright E2E specs with WCAG 2.1 AA/AAA accessibility audits via Axe-Core, 17 Cypress E2E specs), trilingual i18n (PT/EN/ES) and a 100/100/100/100 Google Lighthouse audit on desktop.

Spring Boot E-Commerce API - github.com/DevYuriVieira/ecommerce-serratec-api

Collaborative (Serratec Residency) | 2026 | Java 17 | Spring Boot 3 | Spring Security 6 | PostgreSQL | JPA/Hibernate | Swagger/OpenAPI 3

- RESTful e-commerce backend built in **Java 17 and Spring Boot 3** structured in layers (Controller, Service, Repository and DTOs) to decouple business rules, handle concurrent inventory control and protect domain entities from direct exposure.
- Implements stateless **JWT authentication and granular RBAC in Spring Security 6**, optimized relational mapping with **JPA/Hibernate on PostgreSQL**, and interactive OpenAPI 3 / Swagger UI documentation.

Aurora - Personal Growth Platform - github.com/DevYuriVieira/aurora-growth-platform

Collaborative (6 devs) | 2026 | React Native | Expo SDK 54 | TypeScript | React Navigation | Zod | AsyncStorage | Final Project - Multiplatform Applications

- A **React Native/Expo SDK 54 and TypeScript** app for tracking personal goals, XP gamification, mentorships and community activity, with session persistence (AsyncStorage), Context-API-protected routes and a goals module with full CRUD.
- Combines three navigation patterns in one app (Drawer, Stack and Tabs), Zod-validated forms via **React Hook Form + Zod**, and native device features such as camera, gallery, maps/geolocation through Expo Location, **Expo Secure Store** and **QR-code** event check-in.

Django Full-Stack E-commerce - github.com/DevYuriVieira/liquor-store-django

Personal | 2025 | Python 3.11+ | Django 5.x | SQLite | Vanilla JS (ES6+) | HTML5 <template> | REST API | Idempotent Webhook

- Full-stack e-commerce platform built from scratch (auth, cart, coupons, orders) organised around a **Django 5 Service Layer**, engineered to handle critical concurrency edge cases and eliminate N+1 query bottlenecks via `prefetch_related` and `select_related`.
- Implements an **idempotent async payment webhook** wrapped in atomic transactions (`transaction.atomic`), a versioned REST API built without DRF, and a modular Vanilla JS (ES6+) frontend using native HTML5 `<template>`, CSRF protection and XSS-safe DOM handling via `textContent`.

EDUCATION

Postgraduate Degree - Software Engineering
Estacio University | 2024–2025

Technology Residency - TIC/Software Full-Stack (790 h)
Serratec | Feb 2026 - Jul 2026

Technology Residency - TIC 12 (120 h)
Universidade Estadual do Ceara (UECE) | Oct 2025 - Dec 2025

Bachelor's Degree - Industrial Engineering
Estacio University | 2017 - 2022

CERTIFICATIONS

› **Software Testing Fundamentals (24 h)** - Instituto de Pesquisas Eldorado
› **SQL Database - Intermediate and Advanced** - Instituto Matera
› **Front-End Development with Artificial Intelligence (80 h)** - Senac
› **Philips Full-Stack Developer Bootcamp (Java, Spring Boot, Angular)** - DIO
› **Programming in Python** - Senac
› **White Belt - Lean Six Sigma** - Frons
