Yuri Vieira Teixeira

Front-End & Mobile Software Engineer | TypeScript | React | Angular | React Native

Nova Friburgo, Brazil | +55 22 99896-2216 | yurivieirateixeira98@gmail.com
linkedin.com/in/yuri-vieira-teixeira | github.com/DevYuriVieira | devyurivieira.vercel.app

PROFESSIONAL SUMMARY

Software Engineer specializing in **TypeScript**, **React**, **Angular** and **React Native (Expo)**, with hands-on experience in **REST API integration**, **Design Systems**, declarative motion design and web accessibility (WCAG). I build responsive, high-performance web and mobile interfaces backed by automated test suites (Vitest, Playwright and Cypress). Over 910 h of software development training at Serratec and UECE. Postgraduate in Software Engineering. Advanced English (B2+), with a C1/C2 programme completed at Wizard. Open to national and international remote roles.

KEY ACHIEVEMENTS

Live Production App (Angular 22 & WebGL)	Personal portfolio built with Angular 22 and TypeScript, native Signals and a GPU-accelerated WebGL particle system, covered by 195 automated tests (Vitest, Playwright + Axe-Core and Cypress) and a 100/100/100/100 Lighthouse audit on desktop.
Zeiss AI Recommendation Platform	MVP built with an 11-person team for Zeiss, developing the React and TypeScript frontend for assisted OCR prescription validation, AI-driven lens recommendations and real-time sales dashboards.
Programming Instructor	Taught Programming (JavaScript logic, REST API integration and relational databases) to a class of 10 students at SENAI/FAETEC, creating all teaching material from the institution's syllabus.

TECHNICAL SKILLS

Languages	TypeScript | JavaScript (ES6+) | HTML5 | CSS3 / SCSS | SQL
Frontend Web	React | Angular 22 (Signals, Standalone, OnPush, SSR, PWA) | Three.js / WebGL | Framer Motion | Styled Components | CSS Modules | Vite
Mobile & UI/UX	React Native (Expo SDK 54) | React Navigation (Drawer, Stack, Tabs) | React Hook Form | Zod | Design Systems | Responsive Design & Accessibility (WCAG 2.1 AA/AAA)
Automated Testing	Vitest | Playwright | Cypress | Axe-Core (WCAG Accessibility Audits) | Unit & End-to-End (E2E) Testing
API & Backend Integration	REST APIs | Axios | JWT & RBAC | Generative AI Integration (Google Gemini AI / n8n / OCR) | Java (Spring Boot) | C# (.NET) | PostgreSQL
Tools	Git | GitHub | GitHub Actions | Vercel (CI/CD) | Docker | Figma | Swagger / OpenAPI
Practices	Agile / Scrum | Modular Componentization | Mobile-First | Clean Architecture

PROFESSIONAL EXPERIENCE

Programming Instructor

SENAI / FAETEC | Aug 2026 - Oct 2026 (Contract) | Nova Friburgo, Brazil

- Taught a class of 10 students covering programming logic with **JavaScript**, relational databases with DBeaver and PostgreSQL, OOP in Java and **REST APIs with Spring Boot**, closing with an integrative project.
- Created all teaching material (exercise PDFs, summaries, tutorials and support resources) from the institution's syllabus, plus one-on-one support for students.

Front-End & Full-Stack Developer (Software Residency)

Serratec - TIC/Software Residency | Feb 2026 - Jul 2026 | Petropolis, Brazil | 790 h

- Completed a 790-hour immersive residency with strong focus on **Web Frontend (React, TypeScript, HTML5/CSS3/JS)** and **Mobile (React Native with Expo)** integrated with Spring Boot RESTful APIs, closing with a corporate MVP delivered under contract in partnership with **Zeiss**.
- Delivered practical projects at the end of each subject, building responsive interfaces, schema-validated forms (Zod), state management flows and asynchronous API integrations.
- Worked in an Agile team with Git, code reviews and sprints, applying clean-code standards and strict TypeScript typing across all deliverables.

PROJECTS

Zeiss - AI Recommendation Platform

Collaborative (11 devs, 1 PO, 1 SM) | 2026 | React 19 | TypeScript 6 | Vite 8 | Styled Components 6 | React Router 7 | ApexCharts 5 | Java 17 | Spring Boot 4.1 | OCR & RAG (n8n) - Serratec Final Project · Corporate MVP (contract)

- Optical shop sellers were reading prescriptions and choosing lenses by hand, making recommendations inconsistent. The team built a web platform with a **React 19, TypeScript and Styled Components front end** (connected to a Java 17/Spring Boot 4.1 back end and an n8n/RAG AI pipeline) featuring an assisted Human-in-the-Loop validation modal with field-level OCR confidence scores and matching optical parameters with patient lifestyle habits to recommend the ideal Zeiss lens.
- Built **interactive analytics dashboards with ApexCharts** for store managers and Zeiss headquarters (best-selling and most recommended lenses, temporal trends, conversion rates and seller rankings). Role-based UI route protection backed by a three-tier JWT hierarchy (Zeiss admin, store manager, employee), consultation lifecycle state machine (`RECOMMENDED`, `SOLD`, `CANCELLED`) and full CRUD views for stores, products and employees.

Personal Portfolio - devyurivieira.vercel.app

Personal | 2026 | Angular 22 | TypeScript | Three.js / WebGL | SCSS | Vitest | Playwright | Cypress | PWA | Live in production

- Built with **Angular 22** standalone components, **native Signals (signal/computed)** and `OnPush` change detection throughout, including a GPU-accelerated **Three.js/WebGL** particle system with mouse and touch interactivity, configured as an offline-ready PWA with a service worker.
- Covered by **195 automated tests** across three layers (140 Vitest unit tests, 38 Playwright E2E specs with WCAG 2.1 AA/AAA accessibility audits via Axe-Core, 17 Cypress E2E specs), with trilingual i18n (PT/EN/ES) and a 100/100/100/100 Google Lighthouse audit on desktop across Performance, Accessibility, Best Practices and SEO.

Aurora - Personal Growth Platform - github.com/DevYuriVieira/aurora-growth-platform

Collaborative (6 devs) | 2026 | React Native | Expo SDK 54 | TypeScript | React Navigation | Zod | AsyncStorage | Final Project - Multiplatform Applications

- A **React Native (Expo SDK 54) and TypeScript** mobile app for tracking personal goals, XP/level gamification, mentorships and community activity, with session persistence (AsyncStorage), Context-API-protected routes (`AuthContext`), and a goals module with full CRUD.
- Combines three hybrid navigation patterns in one app (Drawer, Stack and Tabs), Zod-validated forms via **React Hook Form + Zod**, and native device features such as camera, gallery, maps/geolocation through Expo Location, encrypted storage via **Expo Secure Store**, plus a community feed and native **QR-code** event check-in.

PlayStation Evolution Timeline - playstation-evolution-timeline.vercel.app

Personal | 2026 | React 18 | TypeScript 5 | Vite 5 | Framer Motion 11 | CSS Modules | Intersection Observer - github.com/DevYuriVieira/playstation-evolution-timeline

- Live production web application showcasing 30 years of PlayStation console hardware evolution (PS1 to PS5 Pro), engineered with modular **React 18, TypeScript and CSS Modules** components and viewport-centered scroll orchestration via the **Intersection Observer API** (`rootMargin: "-50%"`), eliminating expensive window scroll listeners.
- Implements visibility-triggered numeric counters (`StatsAnimated`) and hardware-accelerated **60 FPS animations using Framer Motion** without layout thrashing, an adaptive `SideTimeline` navigation bar, and an automated CI/CD pipeline via GitHub and Vercel.

Anime Weather Platform - github.com/DevYuriVieira/anime-weather-platform

Collaborative (Pair Programming) | 2026 | React 18 | Vite | Google Gemini SDK | OpenWeather API | Jikan API | CSS Modules | Glassmorphism

- Frontend orchestration system built with **React 18, Vite and CSS Modules** implementing a multi-layered logic pipeline (**Weather → Atmospheric Mood → Anime Genre**), consuming live meteorological data from the **OpenWeather API** and cross-referencing cultural catalogs from MyAnimeList via the **Jikan API**.
- Integrates the **Google Gemini AI SDK** via Prompt Engineering to synthesize context-aware recommendations tailored to the user's live city climate, paired with real-time weather-adaptive UI themes, *Glassmorphism* styling, ambient Lofi audio and protected routes.

EDUCATION

Postgraduate Degree - Software Engineering
Estacio University | 2024–2025

Technology Residency - TIC/Software Full-Stack (790 h)
Serratec | Feb 2026 - Jul 2026

Technology Residency - TIC 12 (120 h)
Universidade Estadual do Ceara (UECE) | Oct 2025 - Dec 2025

Bachelor's Degree - Industrial Engineering
Estacio University | 2017 - 2022

CERTIFICATIONS

› **Front-End Development with Artificial Intelligence (80 h)** - Senac
› **Philips Full-Stack Developer Bootcamp (TypeScript, Angular, Java)** - DIO
› **Software Testing Fundamentals (24 h)** - Instituto de Pesquisas Eldorado
› **SQL Database - Intermediate and Advanced** - Instituto Matera
› **White Belt - Lean Six Sigma** - Frons
